END OF SALE-THANK YOU

A FEW TIPS ON BIDDING:- Since this is Harmer Rookes first minimum bid mail sale, may we remind you once again that bids below the stated minimums will not be accepted. The minimum listed is NOT ordinarily the value of the lot, but merely the price below which it would not be feasible to sell the lot. Retail, trend, or catalogue values are a truer guide to the right price for the item.

With this in mind, you may bid well above the minimum with the confidence that you may, if not outbid, obtain your lot at well below your bid. If, for example, the value of a certain lot is, say, \$150, with a minimum of, say, \$80, and you bid \$150, but the next bid BELOW your is only \$90, you will get the lot at the next jump, which would be \$100.00.

Remember, in this type of auction, you are NOT bidding against a competing floor; therefore, your chances of obtaining the lots you want are substantially increased, as you are bidding against other mail bidders only.

Thanks for your patience, and good luck!

Sincerely,

Joseph H. Rose,
President.

The best U.S. coin book ever struck.

It's Don Taxay's 1971 classic, updated, expanded, reorganized, and made slightly revolutionary by Joseph H. Rose and Howard Hazelcorn.

Here's what the best U.S. coin book ever struck has: It has every U.S. coin ever struck.

Including all the colonials, cabinet coins, essays, territorials, private coins, everything. And with encyclopedic coverage. Everything about everything.

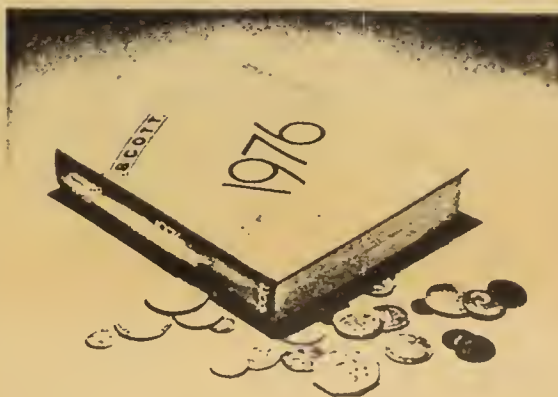

It has twenty five different classes of errors alone, more than any other book.

It has coin prices that are the latest and the most realistic ever compiled. Prices that come from exhaustive research into what's happening at conventions, shows, auctions, and over-the-counter action in stores. (Some of these prices are news.)

It has the first sensible (and badly needed) numbering system U.S. coins have ever had. Every U.S. coin in existence can now be identified by a Scott number instead of, "that copper issued for New Jersey with St. Patrick on it." (Now you can say, "C-328.")

It's the first catalog which prices "Almost Uncirculated" (AU).

Although this is a widely used

grade, it's never been listed before.

It has headings on every page that identify coins listed on that page. It has photographs of the coins right in the listings. It has an index and it has a condition guide at the beginning of each section that tells you how to grade your coins. All of which means you can find what ever you want in a hurry.

And at \$15 per copy, it'll be the best bargain you ever struck.
